CHM1046      Discussion/Assignment Test      Fall 2016

**Instructions:** Use the bond energy table to answer the questions without looking for your answers. If you get stuck, try asking another group for help. Show the work shown on your responses to help your instructor.

**Assignment Instructions:**

- Each group member will be assigned a number starting with #1 ascending with the number of people in the group.
- Students #1 will read the question aloud and sharing the information needed to solve the problem. Students will work on their own and/or the problem.
- When the group agrees that the answer is correct, the student number one will do the final answer. The student group agrees that the answer is correct, student number one will do the final answer. Continue this step until the group agrees that the group answer is correct completely and satisfactorily.
- Students will answer the test question by writing in blue ink. Show the pattern for all the questions in the solution.
