X-Town 3D Game is, well... it's a game i guess. Point your gun left and right and destroy the not fireball fireballs that roam aroud the Windows 95 grade freeware background. This is probably nothing more than a costly way of promoting the dev's freeware website and try to lure idiots like me into paying real money as a donation because I'm a curious little bugger that likes the hurt, and hurt I did.

Props for the balls for doing this though. If it were free for Steam it wouldn't be a probem but it's almost $5 US on here. Of course if you want to try it, go to the publishers website and download it for free. URL is the publisher's name.. https:\/\/youtu.be\/sspf3VYOxfU
