About This Content

A classic Orbx destination brought to life for Aerofly FS 2, virtual pilots are welcomed to Monterey Regional Airport, one of California's most scenic airports.

Monterey is the perfect location for exploring the rugged coastal ranges of Big Sur, world-famous coastline of Carmel and Pebble Beach, and for regional flights to San Francisco, Los Angeles and Palm Springs. Stretching the boundaries of what is possible in Aerofly FS2, this scenery includes the entire City of Monterey in high definition. Featuring accurate airport modelling, unique static aircraft and vehicles, dense hand-placed vegetation and many points of interest around the city, you will find yourself at home in all types of aircraft at this multi-use airfield.

Incorporating unique animation technology, a large coverage area, 3D night lighting and many other features, Monterey truly is the home for all your Californian flying. What more could you want!

I was initially a little hesitant to buy Monterey Airport scenery, but I am glad I did! It is really impressive. Tons of detail around the airport.. The region itself is a great work, which looks awesome especially at night. But it is much less amazing than Innsbruck while they have nearly the same price. The airport is highly detailed, but the scenery and 3D buildings around is even not as fancy as NY. Anyway, considering IPACS released Colorado weeks ago, which is really awesome and is even free. I think this price is acceptable and I recommend buying it for supporting IPACS. I hope they can add more features to this brilliant game in the future..
